

Parenting the Love and Logic Way®

The Love and Logic® approach is easy to use, raises responsible kids and changes lives.

What will I learn?

Participants will learn how to put an end to arguing, back talk and begging. Love and Logic® teaches how to set limits without wagging war while avoiding power struggles along the way. Parents will also learn to teach responsibility without losing their child's love while guiding them to solve their own problems. Love and Logic® will also give you strategies to teach kids to complete chores without reminders and without pay.

What parents Say:

"This program has changed my life! Who knew raising teens could actually be fun!"

"There is very little arguing in our home, mostly because I've learned to go brain dead and neutralize arguing"

"Learning about and how to use contributions to the family made the biggest difference"

"I thought there was something wrong with my child and was frustrated that he didn't behave. I realize now that I had been bossing him around instead of being a Love and Logic parent. Now I use empathy and let the consequences do the teaching"
